DETAILED ACTION

Election/Restrictions

In the Response to Restriction Requirement dated July 12, 2004, Applicant has elected the Group I invention, claims **1-16** with traverse, drawn to a device is acknowledged. Accordingly, claims **17-29** are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 35 § 1.142(b) and MPEP § 821.03. Applicant has the right to file a divisional application covering the subject matter of the non-elected claims **17-29** of the Group II invention, drawn to a method.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone conversation with Joe McKinney Muncy on August 12, 2004.

The application has been amended as follows:

This application is in condition for allowance except for the presence of non-elected claims **17-29**. Accordingly, claims **17-29** have been canceled.

Allowable Subject Matter

Claims **1-16** are allowed.

The following is an examiner's statement of reason for allowance: The prior art of record fails to teach or suggest the limitation recited a memory device with multiple bits per cell, comprises a doped semiconductor region disposed laterally in contact with a sidewall of the side electrode, such that the doped semiconductor region forms a diode, or the junction between the side electrode and the doped semiconductor region forms a diode; a layer of phase-changing material disposed laterally in contact with a sidewall of the doped semiconductor region, such that the doped semiconductor region is disposed between the layer of phase-changing material and the side electrode as claimed in independent claim 1; and a memory device with multiple bits per cell, comprises a storage region laterally disposed between the first and second side electrodes, wherein the storage region includes: a first doped semiconductor region disposed laterally in contact with a sidewall of the first side electrode, such that the first doped semiconductor region forms a diode, or the junction between the first side electrode and the first doped semiconductor region forms a diode; a second doped semiconductor region disposed laterally in contact with a sidewall of the second side electrode, such that the second doped semiconductor region forms a diode, or the junction between the second side electrode and the second doped semiconductor region forms a diode; a layer of phase-changing material disposed laterally between and in contact with the first and second doped semiconductor regions as claimed in independent claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
